

Education After Google?

The New Intellectual Properties of Learning

John Willinsky

Pacific Press Professor of Literacy and Technology at the University of British Columbia

Wednesday, April 25, 2007

7:00 PM to 8:30 PM

Great Room at 19 University Place, 1st Floor

New York University

Open access to research and scholarship represents another kind of upheaval in scholarly publishing. It is leading to a new sense of entitlement to knowledge, much as the printing press did with the Bible, more than five centuries ago.

Dr. John Willinsky is the author of *Empire of Words: The Reign of the OED* and a developer of Open Journals Systems software. His 2006 book, *The Access Principle: The Case for Open Access to Research and Scholarship* has won awards from both the American Library Association and *Computers and Composition: An International Journal*.

Free and Open to the Public

Sponsored by ECT @ NYU Steinhardt, the Program in Educational Communication and Technology in the Department of Administration, Leadership, and Technology.

For more information, please contact Dr. Ricki Goldman at ricki@nyu.edu.
