FIELDWORK II PLACEMENT ACKNOWLEDGEMENT FORM

I have received a copy of this manful and acknowledge responsibility for its content.

I have been given the dates specifying the deadlines for the submission of all paperwork.

I realize that handing in paperwork late or incomplete jeopardizes my fieldwork selection status.

I realize that I may not be given my preference in the selection of a placement site, but that my choices will be strongly considered.

SUMMARY COMMENTS:
.ADDRESSES STUDENT’S CLINICAL COMPETENCE

AOTA grants permission to photocopy the Fieldwork Performance Evaluation for the Occupational Therapy Student for training purposes only. Training purposes encompass using the FWPE forms in student notebooks and training manuals for clinical fieldwork sites, in training sessions for practitioners on the proper use and scoring of the forms, and for students to complete a self-analysis during their fieldwork training. Permission to use the forms must be submitted to copyright@aota.org
Fieldwork Performance Evaluation
For The Occupational Therapy Student

This evaluation is a revision of the 1987 American Occupational Therapy Association, Inc. Fieldwork Evaluation Form for the Occupational Therapist and was produced by a committee of the Commission on Education.

PURPOSE

The primary purpose of the Fieldwork Performance Evaluation for the Occupational Therapy Student is to measure entry-level competence of the occupational therapy student. The evaluation is designed to differentiate the competent student from the incompetent student and is not designed to differentiate levels above entry level competence. For further clarification on entry-level competency refer to the Standards of Practice for Occupational Therapy1.

The evaluation is designed to measure the performance of the occupational therapy process and was not designed to measure the specific occupational therapy tasks in isolation. This evaluation reflects the 1998 Accreditation Council for Occupational Therapy Education Standards2 and the National Board for Certification in Occupational Therapy, Inc. Practice Analysis results3. In addition, this evaluation allows students to evaluate their own strengths and challenges in relation to their performance as an occupational therapist.

USE OF THE FIELDWORK PERFORMANCE EVALUATION FOR THE OCCUPATIONAL THERAPY STUDENT

The Fieldwork Performance Evaluation is intended to provide the student with an accurate assessment of his/her competence for entry-level practice. Both the student and fieldwork educator should recognize that growth occurs over time. The midterm and final evaluation scores will reflect development of student competency and growth. In order to effectively use this evaluation to assess student competence, site-specific objectives need to be developed. Utilize this evaluation as a framework to assist in ensuring that all key performance areas are reflected in the site-specific objectives.

Using this evaluation at midterm and final, it is suggested that the student complete a self-evaluation of his/her own performance. During the midterm review process, the student and fieldwork educator should collaboratively develop a plan, which would enable the student to achieve entry-level competence by the end of the fieldwork experience. This plan should include specific objectives and enabling activities to be used by the student and fieldwork educator in order to achieve the desired competence.

The Fieldwork Educator must contact the Academic Fieldwork Coordinator when: (1) a student exhibits unsatisfactory behavior in a substantial number of tasks or (2) a student's potential for achieving entry-level competence by the end of the affiliation is in question.

DIRECTIONS FOR RATING STUDENT PERFORMANCE

• There are 42 performance items.
• Every item must be scored, using the one to four point rating scale (see below).
• The rating scales should be carefully studied prior to using this evaluation. Definitions of the scales are given at the top of each page.
• Circle the number that corresponds to the description that best describes the student's performance.
• The ratings for the Ethics and Safety Items must be scored at 3 or above on the final evaluation for the student to pass the fieldwork experience. If the ratings are below 3, continue to complete the Fieldwork Performance Evaluation to provide feedback to the student on her/his performance.
• Record midterm and final ratings on the Performance Rating Summary Sheet.
• Compare overall midterm and final score to the scale below.

OVERALL MIDTERM SCORE
Satisfactory Performance ............... 90 and above
Unsatisfactory Performance ............. 89 and below

OVERALL FINAL SCORE
Pass .................................. 122 points and above
No Pass ................................ 121 points and below

RATING SCALE FOR STUDENT PERFORMANCE

4 — Exceeds Standards: Performance is highly skilled and self-initiated. This rating is rarely given and would represent the top 5% of all the students you have supervised.

3 — Meets Standards: Performance is consistent with entry-level practice. This rating is infrequently given at midterm and is a strong rating at final.

2 — Needs improvement: Performance is progressing but still needs improvement for entry-level practice. This is a realistic rating of performance at midterm, and some ratings of 2 may be reasonable at the final.

1 — Unsatisfactory: Performance is below standards and requires development for entry-level practice. This rating is given when there is a concern about performance.

GLOSSARY

Client Factors: Those factors that reside within the client and that may affect performance in areas of occupation. Client factors include body functions and body structures:
- body functions (a client factor, including physical, cognitive, psychosocial aspects)—“the physiological function of body systems (including psychological functions)” (WHO, 2001, p.10)
- body structures—“anatomical parts of the body such as organs, limbs and their components [that support body function]” (WHO, 2001, p.10)

Code of Ethics: Refer to www.aota.org/general/coe.asp

Collaborate: To work together with a mutual sharing of thoughts and ideas (ACOTE Glossary)

Competency: Adequate skills and abilities to practice as an entry-level occupational therapist or occupational therapy assistant

Context: Refers to a variety of interrelated conditions within and surrounding the client that influence performance. Contexts include cultural, physical, social, personal, spiritual, temporal and virtual. (Occupational therapy practice framework: Domain and process. American Journal of Occupational Therapy, 56, 606–639)

Efficacy: Having the desired influence or outcome (from Neistadt and Crepeau, eds. Willard & Spackman’s Occupational Therapy, 9th edition, 1998)

Evidence-based Practice: “Conscientious, explicit and judicious use of current best evidence in making decisions about the care of individual patients. The practice of evidence-based [health care] means integrating individual clinical expertise with the best available external clinical evidence from systematic research.” (Sackett and colleagues, Evidence-based medicine: How to practice and teach EBM, 1997, p.2) (From the Mary Law article “Evidence-Based Practice: What Can It Mean for ME?”, www.aota.org)

Occupation: Groups of activities and tasks of everyday life, named, organized, and given value and meaning by individuals and a culture; occupation is everything people do to occupy themselves, including looking after themselves (self-care), enjoying life (leisure), and contributing to the social and economic fabric of their communities (productivity); the domain of concern and the therapeutic medium of occupational therapy. (Townsend, ed., 1997, Enabling Occupation: An Occupational Therapy Perspective, p.181)

Occupational Performance: The result of a dynamic, interwoven relationship between persons, environment, and occupation over a person’s lifespan; the ability to choose, organize, and satisfactorily perform meaningful occupations that are culturally defined and age appropriate for looking after oneself, enjoying life, and contributing to the social and economic fabric of a community. (Townsend, ed., 1997, Enabling Occupation: An Occupational Therapy Perspective, p.181)

Occupational Profile: A profile that describes the client’s occupational history, patterns of daily living, interests, values and needs. (Occupational therapy practice framework: Domain and process. American Journal of Occupational Therapy, 56, 606–639)

Spiritual: (a context) The fundamental orientation of a person’s life; that which inspires and motivates that individual. (Occupational therapy practice framework: Domain and process. American Journal of Occupational Therapy, 56, 606–639)

Theory: “An organized way of thinking about given phenomena. In occupational therapy the phenomenon of concern is occupational endeavor. Theory attempts to (1) define and explain the relationships between concepts or ideas related to the phenomenon of interest, (2) explain how these relationships can predict behavior or events, and (3) suggest ways that the phenomenon can be changed or controlled. Occupational therapy theory is concerned with four major concepts related to occupational endeavor: person, environment, health, and occupation.” (Neistadt and Crepeau, eds., Willard & Spackman’s Occupational Therapy, 9th ed., 1998, p. 521)
Purpose: This form is important feedback for your Fieldwork educator, your faculty, and other students at your school.

Directions: Complete this Student Evaluation of Fieldwork Experience (SEFWPE) form in ink prior to your final meeting with your Fieldwork supervisor. Your supervisor too will have completed your student performance evaluation for review at this meeting. Share the completed SEFWPE with your supervisor, and the form should be co-signed. One copy remains with the Fieldwork site and one copy is returned to your educational program.
