

Using Google Scholar

Why?

Because it searches all article databases, psychinfo, medline, pubmed, etc. Saves time and makes it easier to find articles. It's the fastest and most comprehensive way to find and get articles.

To get to google scholar, type scholar into google or go to: <http://scholar.google.com>

The screenshot shows a web browser window titled "scholar - Google Search". The address bar contains the URL <http://www.google.com/search?hl=en&q=scholar&btnG=Google+Search>. The search bar contains the text "scholar" and is highlighted with a red box. To the right of the search bar are buttons for "Search", "Advanced Search", and "Preferences". Below the search bar, the results are displayed under the heading "Web Scholar". The first result is "Google Scholar", which provides a search of scholarly literature across many disciplines and sources, including theses, books, abstracts and articles. The second result is "Google Advanced Scholar Search", which provides a search of scholarly literature across many disciplines and sources, including theses, books, abstracts and articles. The third result is "Scholar", which provides a search of scholarly literature across many disciplines and sources, including theses, books, abstracts and articles. The fourth result is "Heriot-Watt University Edinburgh: The SCHOLAR programme", which provides a search of scholarly literature across many disciplines and sources, including theses, books, abstracts and articles. The fifth result is "Google Scholar - Wikipedia, the free encyclopedia", which provides a search of scholarly literature across many disciplines and sources, including theses, books, abstracts and articles.
