

OUR VISION OF UNDERGRADUATE STUDY

Students entering NYU and the Steinhardt School will carry responsibilities well into this century. They will pursue career and personal paths in many occupations and settings, both at home and abroad. The challenge of undergraduate education is to give students an unparalleled academic experience and opportunities that suit their needs and aspirations.

NYU meets this challenge by providing students with a sound academic foundation and the professional skills necessary to achieve their goals.

At NYU Steinhardt we share the commitment to building the academic core experience, one that embodies high standards and an intellect common to the scientist, the artist, and the humanist. Each Steinhardt major is structured to cultivate specialized, professional knowledge and individual forms of expression, preparing students for professional life and ensuring that they can place their personal stamp on their chosen field of study through:

- Academic coursework in:
 - the liberal arts and sciences
 - specialty fields
- Field Placements
- Internships
- Study Abroad
- Research
- Community Service

Our aim is for our students to graduate with the wherewithal to adapt, grow, and thrive wherever they are, no matter what path they choose to follow in their professional and creative lives.

ADMISSIONS

Deadlines for the receipt of applications and all supporting credentials for **Summer or Fall Semester:**

Freshmen (Early Decision)	November 1
Freshmen (Regular Decision)	January 1
Transfers	April 1

Deadlines for the receipt of applications and all supporting credentials for **Spring Semester:**

Transfers	November 1
-----------	------------

FINANCIAL AID

Please submit your Free Application for Federal Student Aid (FASFA) as follows:

Fall or Summer Entry:

Freshmen	by February 15
Transfers	by March 1

Spring Semester (January) Entry:

Transfers	by November 1
-----------	---------------

NYU Steinhardt Quick Guide to Undergraduate Programs

APPLIED PSYCHOLOGY

www.steinhardt.nyu.edu/appsych/undergraduate

The major in Applied Psychology is designed to provide students with a comprehensive knowledge of the theory and practice of psychology with an emphasis on the contexts that influence the behavior and development of children, adolescents, adults, parents, and families. Opportunities to apply the knowledge gained in lectures and readings are abundant through a required field experience in both research and real-world settings. Links between theory, research, and application are recurrent themes throughout the program. Qualified students interested in designing and conducting independent research projects are encouraged to apply for the Honors Program. Exceptional research proposals and projects developed by graduating seniors are presented during the Annual Research Conference held in the spring. Students can also study abroad for a semester at one of NYU's ten global centers.

COMMUNICATIVE SCIENCES AND DISORDERS (formerly Speech-Language Pathology)

www.steinhardt.nyu.edu/speech/bachelor

Our dynamic and rigorous undergraduate program in communicative sciences and disorders is designed to integrate liberal arts and science coursework with a solid foundation in normal and disordered human communication processes across the lifespan. Students join a small, supportive academic community and observe ongoing therapy in our on-campus, state-of-the-art speech and hearing clinic. You'll have the opportunity to study abroad at one of NYU's global centers. Speech-language pathologists work in such diverse environments as schools, hospitals, intensive care units, early intervention centers, rehabilitation centers, private practices, and corporate offices.

EDUCATIONAL THEATRE

www.steinhardt.nyu.edu/edtheatre/ug

In this dynamic theatre and education program students explore multiple ways to use drama in the classroom, through civic engagement in the community, and on the stage. The program offers a foundation in theatre arts, as well as diverse coursework in pedagogical methods and liberal arts (history, literature, philosophy and social sciences), all leading to teacher certification. Additionally, on-campus productions and opportunities in the city provide students with hands on experiences as actors, playwrights, directors, teachers, and producers of theatre for audiences of all ages. Students can also study abroad for a semester at one of NYU's ten global centers.

MEDIA, CULTURE, AND COMMUNICATION

www.steinhardt.nyu.edu/mcc/undergraduate

In this program, students take an interdisciplinary approach to the study of communication — from film and television, to print media, to new media and the Internet — and the many ways in which various media interact with business, government, non-profit organizations, and the everyday life of individuals. Focus in areas of study such as globalization and transcultural communication, images and screen studies, persuasion and politics, interaction and social processes, and technology and society. Participate in internships at top media and communications companies in New York City, the communication club, and special lectures. Take courses in Prague, Paris, and Shanghai.

MUSIC AND MUSIC PROFESSIONS

www.steinhardt.nyu.edu/music

- Music Business
- Music Composition (traditional, film scoring, music theatre, jazz, computer/electronic)
- Music Education
- Music Performance (classical, jazz)
- Music Technology
- Vocal Performance (music theatre, classical)

These music-based programs, along with a foundation in the liberal arts and opportunities for interdisciplinary study, prepare students to be the best performers, composers, educators, technologists, and business professionals. Take advantage of a world renowned faculty, diverse performing opportunities, and our state-of-the-art computerized learning and recording studios. Experience New York City, the music capital of the world, as you participate in exciting projects with composers, performers, film scorers, and theatre specialists; student teach in the city's diverse public schools; learn how to market music through our own label, Village Records, Inc.; or intern with arts organizations and entertainment companies. Study music abroad at NYU Prague or NYU Florence.

NUTRITION AND FOOD STUDIES

www.steinhardt.nyu.edu/nutrition/undergraduate

- Nutrition and Dietetics
- Food Studies

This unique program allows you to combine your enjoyment of food with an interest in health, culture, or business. Learn how such factors as geography, climate, marketing and trade practices, social trends, economic status, and family background affect food choices, production, and consumption. Gain a thorough understanding of human nutritional needs and how to help people maintain and improve their health by making appropriate food choices. The program's strengths are a strong foundation in the liberal arts and sciences; core lectures and lab courses that explore and integrate food studies, nutrition, and health; and extensive opportunities for elective courses and internships. You can also study abroad at one of NYU's ten global centers.

PUBLIC HEALTH

www.steinhardt.nyu.edu/nutrition/public_health/bs

One of only a few undergraduate public health programs in the country, this program offers students the opportunity to build knowledge and skills in the field of public health in coursework and in internship experiences. Students examine the magnitude and depth of major public health challenges across the globe — from HIV/AIDS, to violence, to malaria, to access to primary health care — and the ways in which these can be addressed at a local, national, and international level. The program combines a strong liberal arts foundation with courses in epidemiology (the study of disease), global public health, environmental public health, public health nutrition, and other topics. Students may deepen their understanding of a particular field by declaring a minor in an area of study directly related to public health, or outside the field. Semester or year-long programs at any of NYU's ten global study sites provide further opportunities to enhance students' education.

STUDIO ART

www.steinhardt.nyu.edu/art/studio/bfa

This intensive art-making Bachelor of Fine Arts program combines cutting-edge ideas with a wide range of technical approaches, ranging from oil painting to digital media and installation art. Participate in the student art club, exhibit your work in private and public venues, and make connections with leading contemporary artists who teach in the program. Work in artist studios, create public sculpture with a faculty member, or intern at alternative art galleries or major museums. Participate in an exciting Global Art Track in Berlin and Ghana.

TEACHER EDUCATION

www.steinhardt.nyu.edu/teachlearn/undergraduate

- Childhood Education/Childhood Special Education
- Early Childhood Education/Early Childhood Special Education
- Secondary Education: English, Foreign Languages, Mathematics, Science, Social Studies

Built on a liberal arts foundation and a common core of pedagogy courses, our teacher education programs engage you in fieldwork in schools, classrooms, and other educational settings from the very first semester. Coursework and student teaching ensure that graduates know their subject areas and how to teach them, understand children from birth to adolescence and how to help them learn, comprehend the complex realities of schooling, family, and community life affecting children's learning, and are committed to equity, social justice, and excellence. Participate in extracurricular activities, including the Future Educators Club, where you can network with professional educators. Take courses abroad at one of NYU's ten global centers.
