The Institute of Human Development and Social Change (IHDSC) is pleased to announce its 14th call for seed award applications!

IHDSC is committed to funding new projects that bridge multiple domains of expertise and further the mission of the Institute. Eligible applicants may receive up to $20,000 in research support.

Read our full call for more information.
Funding Priorities

We provide seed funding to new projects that fall under one or more of our five focus areas:

• Education and Child Development
• Race, Poverty, and Inequality
• Health and Wellbeing
• Justice and Welfare Systems
• Research, Policy, and Practice Partnerships

We prioritize proposals that include:

• Early-career investigators
• Faculty or investigators who are new to IHDSC and/or NYU
• New interdisciplinary teams
• Partnerships with community based organizations, non-profit organizations, NGOs, government agencies, or external groups focused on policy or practice
Eligibility & Restrictions

- All full-time, tenure-track faculty members are eligible to apply. Research Scientists who have PI status are also eligible to apply.
- At least one of the lead investigators must be from one of the core schools affiliated with IHDS:
  - Steinhardt School of Culture, Education and Human Development
  - Arts and Science
  - Robert F. Wagner School of Public Service
- Proposals must draw upon theoretical and/or analytic approaches from multiple disciplines.
- A letter with the chair’s signature or review/approval from OSP is NOT required. Previous IHDS seed grant awardees cannot re-apply for funding for the same project.
Evaluation

An interdisciplinary group of faculty reviewers will evaluate proposals based on quality, feasibility, and the following other criteria:

1. **Interdisciplinary nature:** Proposed research projects must be interdisciplinary in nature. This criterion is often met by an investigator working collaboratively with one or more researchers in other disciplines, departments, or schools, where the theory and tools of two or more social science disciplines will be used.

   Collaboration with faculty or researchers at NYU is strongly encouraged, but external collaboration is also acceptable. If partnering with an external policy or practice organization, it may be possible to meet the interdisciplinary criterion by including appropriate staff (i.e. Director of Research, Director of Evaluation) on the project.

   Individual investigators are also eligible to apply, but applications should highlight plans for the investigator to incorporate theory, models, and methods commonly used in a discipline other than their “home discipline.”

2. **Fit with IHDSC priorities:** Reviewers will evaluate whether the project is a fit within the focus areas and funding priorities of IHDSC. A majority of research projects conducted at IHDSC include the study of human development in context or as a result of intervention. Context(s) may include, but are not limited to, families, schools, neighborhoods, the workforce, the justice system, or the economy. Interventions may be at the individual- (e.g., person) or setting- (e.g., community or school) level.

3. **Pilot for future study:** This RFA is specifically targeted as “seed” or “pilot” support for projects that are large in scope, where faculty members hope to secure future external funding. High priority will be given to investigators with a well-articulated plan for submitting grant applications for external funding (with funders, deadlines, and submission requirements clearly specified). Proposals will also be considered from investigators who have recently submitted a grant application through IHDSC to federal or foundation sources, but would benefit from support to complete preliminary analyses or pilot research to increase the likelihood of gaining funding for such efforts. Please note that seed award recipients will be required to submit related external proposals through IHDSC, or as collaborative proposals through IHDSC and another unit at NYU.

4. **Impact:** Priority will be given to investigators with articulated plans for disseminating project findings, and with projects that have a high likelihood of informing a diverse group of academic, policy, and practitioner audiences. Successful applicants will be expected to engage with the Institute’s intellectual community, give at least one presentation about the project at an IHDSC event, or contribute to IHDSC’s blog, On the Ground.
Grantee Responsibilities

Awardees will be expected to:

- **Participate** in IHDSC-sponsored activities whenever possible, including attending Institute-sponsored seminars and IHDSC thematic area meetings on topics related to the project;

- **Meet** with IHDSC staff to discuss external funding possibilities and plan for future proposals. Awardees will be expected to submit proposals for external support for the project through IHDSC. Collaborative submissions between IHDSC and other units at NYU are also a possibility;

- **Contribute** content to IHDSC’s blog, *On the Ground*, or present to IHDSC’s community;

- **Alert** Institute staff of any external publications or media coverage resulting from the project;

- **Submit** short annual progress and financial reports; and

- **Meet** award requirements.

Recent Seed Awards

- “College Access and Persistence among Urban Asian American Students”
  
  **PIs:** Drs. Sumie Okazai, Stella Flores, and Hua-Yu Sebastian Cherng
  
  **Community Partner:** Coalition for Asian American Children and Families

- “Supporting Juvenile Offenders with Disabilities through Education Transition Teams”
  
  **PIs:** Dr. Natasha Strassfeld, Randy Hertz, JD, & Melissa McDaniel
  
  **Community Partner:** Cuyahoga County Court of Common Pleas, Juvenile Division

- “Survey Experiments on Americans’ Perceptions and Attitudes about Economic Inequality and Social Mobility”
  
  **PIs:** Dr. Siwei Cheng, Fangqi Wen

How to Apply

Detailed instructions will be available on IHDSC’s online portal beginning November 15, 2018. All applications must include the following seven (7) parts:

1. Proposal title
2. Abstract
3. Project Period
4. Project Description
The project description should be 3 to 5 single-spaced pages including all pictures, graphs, tables, and references. Be succinct. Please include answers to all of the following questions:

• Program overview and design
• State of knowledge
• Impact
• Statement of potential results
• Incorporation of students
• Availability of funding

Detailed instructions and prompts will be available on the online portal.

5. Curriculum Vitae (CV)
Include CVs or Biosketches for all senior/key personnel involved the proposed project. Each CV or Biosketch should be 10 pages or less.

6. Budget
Awards typically range from $5,000 - $15,000, and will not exceed $20,000. Funds cannot be used to support faculty effort. Budgeted expenses may include wages for student assistants, fringe benefits, travel related to data collection, fieldwork expenses, subject incentives, consultation, hourly assistance, etc. A budget template will be available on the online portal.

7. Human Subjects Information
All funded proposals that include the participation of human subjects as part of their research design must be reviewed and approved by the New York University Committee on Activities Involving Human Subjects (UCAIHS). Please indicate in your seed application whether human subjects will be involved in your research, and if so, the status of your human subjects application.

Optional Attachments:
Feel free to include letters of support from any external partners or data collection sites.

IHDSC’s application portal goes live on November 15, 2018. All application materials must be uploaded to the portal by Friday, December 14, 2018.

Visit our Seed Award website for more information.
