Single Case Designs and Beyond Workshop

Friday, November 3, 2017
8:30 AM - 4:30 PM
NYU Steinhardt Kimball Hall
246 Greene Street
Conference room 301W

This symposium brought practitioners and methodologists together to better understand the needs and use of single subject designs in rehabilitation and behavioral interventions.

Schedule:

Introductory Remarks:

• Dr. Ying Lu (NYU Steinhardt, PRIISM Center)

Morning Practitioner Talks:

• Dr. Tara McAllister (NYU Steinhardt, Department of Communicative Sciences and Disorders): Using single-subject experimental methods to study interventions for speech disorder

• Dr. Adam Buchwald (NYU Steinhardt, Department of Communicative Sciences and Disorders): Enhancing motor speech production with neuromodulation: A single subject design study

Morning Methodologist Talks:

• Dr. Mariola Moeyaert (SUNY-Albany, Department of Educational and Counseling Psychology): Methodological issues in the analysis of single-case experimental data

• Dr. Christopher Schmid (Brown University, Center for Evidence Synthesis in Health): N-of-1 trials for making personalized treatment decisions with personalized designs using self-collected data

Afternoon Panel Discussions:

• Practitioner discussion on individualized medicine and considerations beyond randomized control trials, with Dr. Preeti Raghavan (NYU Langone, Department of Rehabilitation Medicine) and Dr. Anat Lubetzky (NYU Steinhardt, Department of Physical Therapy)

• Methodologist discussion on causal inference and related issues for Single Case Designs, with Dr. Andrew Gelman (Columbia University, Applied Statistics Center) and Dr. Jennifer Hill (NYU Steinhardt, PRIISM Center); Moderated by Dr. Marc Scott (NYU Steinhardt, PRIISM Center)

Concluding Remarks:

• Dr. David Rindskopf (CUNY Graduate Center, Educational Psychology Program)
